Recording medium - Definition

A **recording medium** is a physical material that holds information expressed in any of the existing recording formats.

Ancient examples:

- paper (painted or written with a pencil)
- clay and stone (carved or incised)
- wax tablets
- chalk
- quipu

Examples since the 19th century include:

- photographic film
- wax for recording cylinders
- "shellac" compound and later vinyl for analog disk records
- plastic sheet for Dictaphone recorders
- steel wire for magnetic wire recorders
- magnetic tape
- rigid magnetic disks and cylinders
- floppy magnetic disks
- pressed optical media for CDs and DVDs
- write-once, read-many optical media for writable CDs and DVDs
- read-write optical media for rewritable CDs and DVDs
- flash memory media
